*"Learning data science
and technology online
from anywhere in the world"*

Diploma

The Catholic University of Portugal issues the programme diploma, which is fully recognised in Portugal, Macau, and internationally (Bologna Convention and its associated countries).

Programme

Pre-registration

More Information

Why Data Science and Technology

The field of data science and technology is a rapidly growing area across various sectors, with significant demand in the job market. This programme enables the exploration of both classic and advanced techniques for extracting knowledge from data to support decision-making processes in different organisational and market contexts.

Admittance Online Examination

- Mathematics A & English

Program Description

The programme provides comprehensive training in **computer programming**, **artificial intelligence**, and **descriptive, predictive, and prescriptive analytics**, along with technologies for processing large volumes of data, enabling students to develop both analytical thinking and practical application skills. The aim is to prepare professionals, such as data scientists and engineers, for careers in data science and analytics.

As an online programme delivered entirely in English by the Catholic University of Portugal in collaboration with the University of Saint Joseph in Macau, it offers access to a variety of realities and opens up new career opportunities.

Advanced Studies

When completed this Bachelor's Programme, you are strongly encouraged to continue your studies with a Master of **Business Administration (MBA) at the University of Saint Joseph in Macau**, or a **Master of Business Analytics at Católica, Lisbon, Portugal**.
